

## HYDRANT BEND

**Type A**

It is indispensable to open the valve of the hydrant head, by means of the special manoeuvre wheel.  
It is made of light alloy with bronze and stainless steel parts.

It is produced in the following models:

- type A : with bayonet connection;
- type V : with spear connection.

It ends with consolidated Gas thread corresponding to the nominal diameter, where, if requested, a suitable joint may be tightened to the coupler of the mobile duct.

**Type V**

It is built for the following diameters:

Type A	Type V
Ø 60 x 2"	
Ø 80 x 3"	Ø 80 x 3"
Ø 100 x 4"	Ø 100 x 4"
Ø 120 x 5"	
	Ø 150 x 6"
