

## HIGH HYDRANT BEND

This bend is foreseen to be set to hydrant heads in traps.

It is produced in the following models:

- type A – with bayonet connection;
- type V – with spear connection.

It ends with consolidated Gas thread corresponding to the nominal diameter, where, if requested, a suitable joint may be tightened to the coupler of the mobile duct.

It is built for the following diameters:

Type A	Type V
Ø 60 x 2"	Ø 60 x 2"
Ø 80 x 3"	Ø 80 x 3"
Ø 100 x 4"	Ø 100 x 4"
Ø 120 x 5"	Ø 120 x 5"
