

NET FILTER

This kind of filter is one of the simplest among the several techniques of filtration and shower installations. It is made of hot galvanized steel, formed by a cylindrical container, which has inside a filtering cartridge of different sieve according to the type of water to filter or to the type of installations, drip or shower.

We can wash cartridge extracting it easily from the container.

Diameter	Discharge		
	l./min.	l./sec.	mc./h.
Ø mm			
60 x 2"	300	5	18
80 x 3"	600	10	36
100 x 4"	1.200	20	72
125 x 5"	1.800	30	108
150 x 6"	3.000	50	180
